# PDF EXPORT ACCURIO PRO FLUX

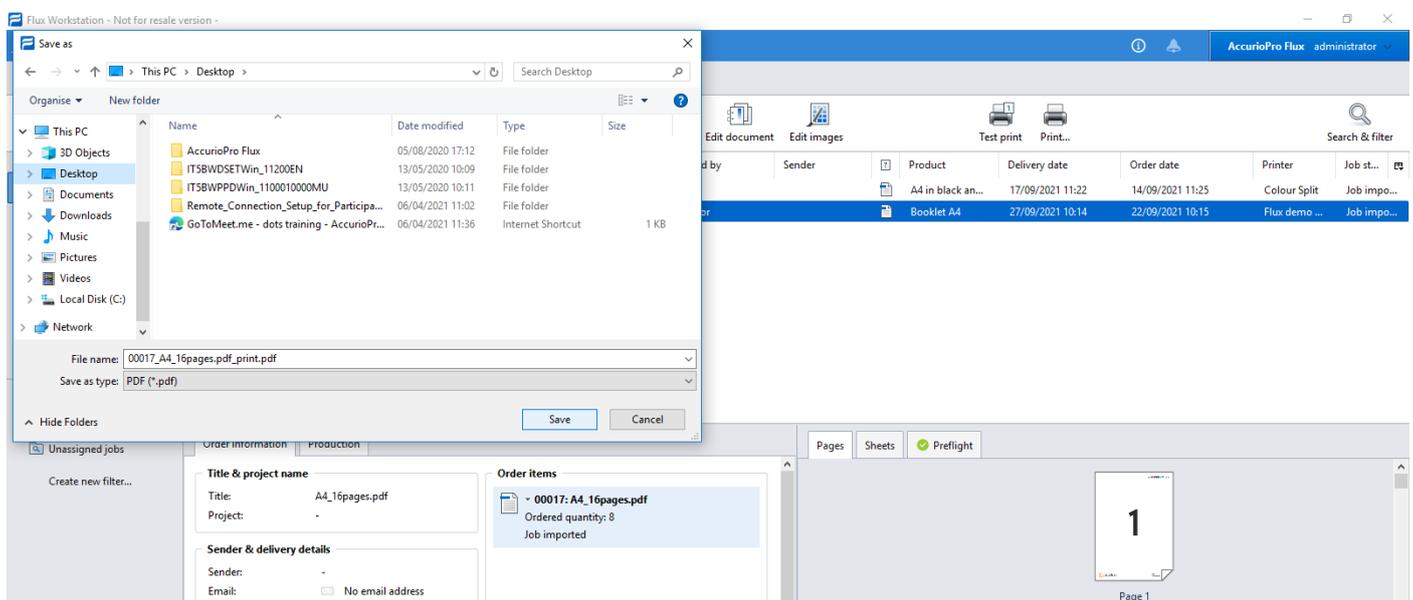

To export a print ready PDF from Accurio Pro Flux Workstation or Accurio Pro Flux Server use the following steps.

If you have Flux Workstation, find the job in the incoming job list and ensure the correct product has been assigned to it so that it is paginated the way you want it in Sheet view.

Then right click on it, the context menu will appear and look like the image below.

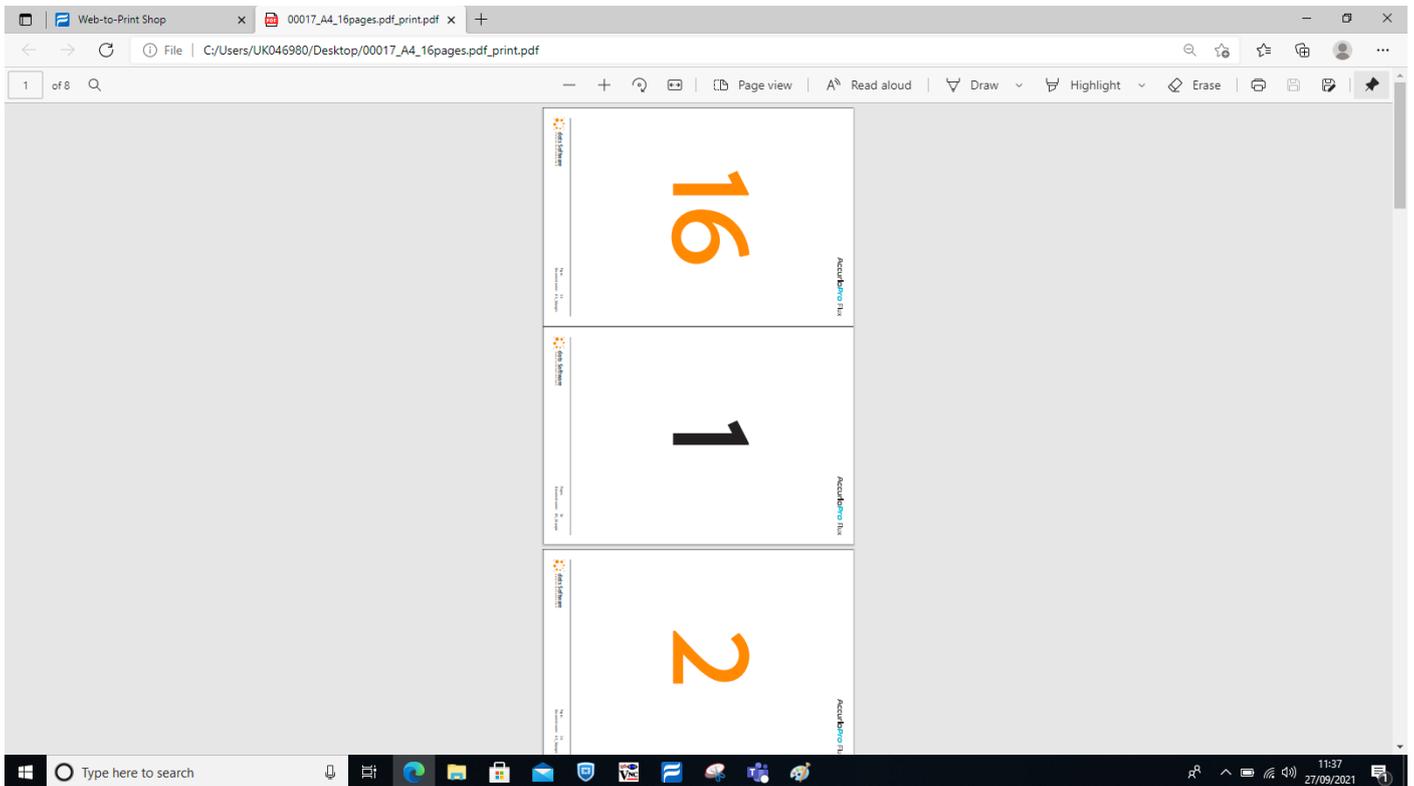

Select the Print file option and Save as...

Choose where you want to save the print PDF to and click on Save.

The PDF is then saved as an imposed ready to print file.

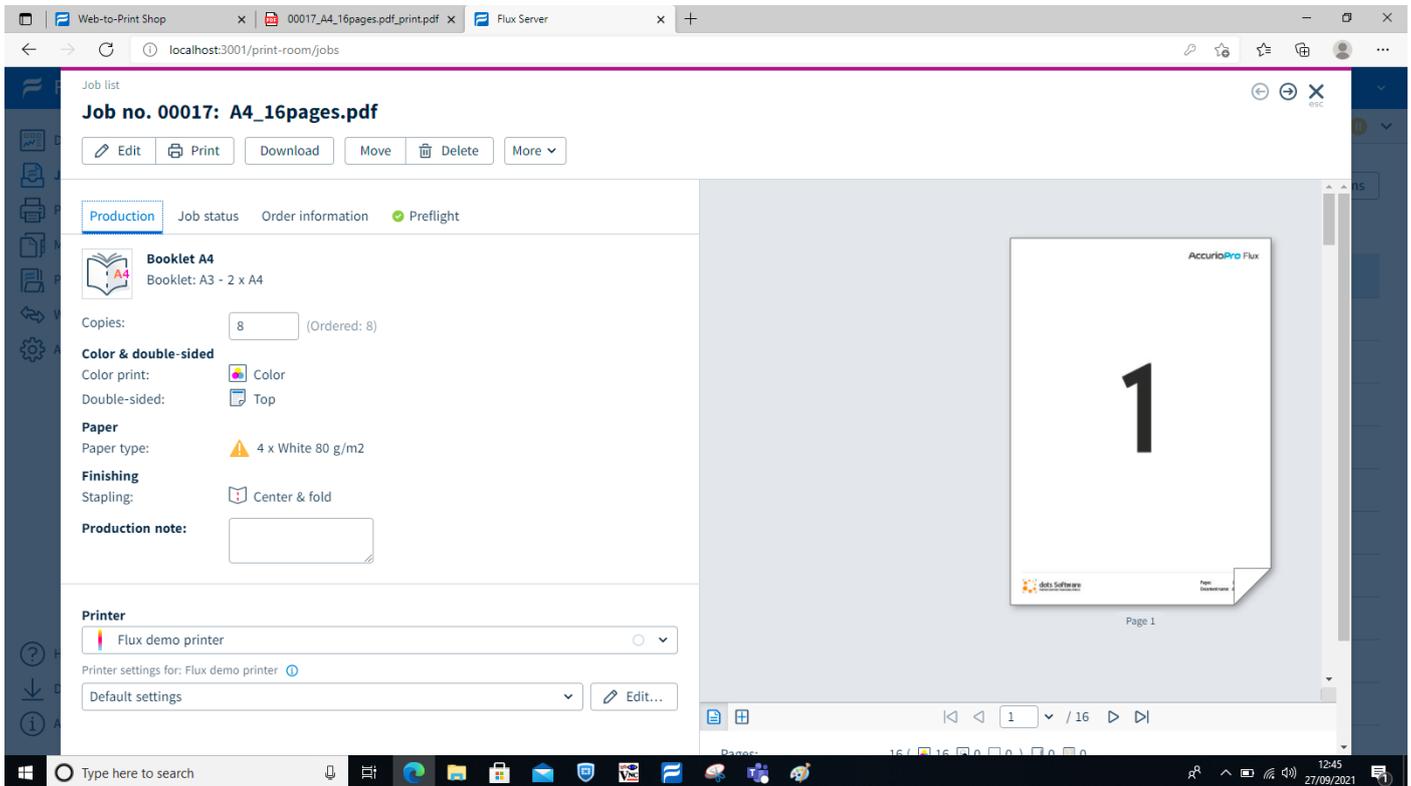

If you are working in Flux Server again find the job in the Job list as shown.

The screenshot shows the Flux Server web interface. The top navigation bar includes the Flux Server logo, a search bar, and the user profile 'administrator AccurioPro Flux'. The left sidebar contains navigation options: Dashboard, Job list, Printers & clusters, Media, Print products & services, Workflow, and Administration. The main content area displays a table of print jobs. The 'View' button in the top toolbar is highlighted in red. The job list table has the following data:

		Job no.	Title	Sender	Delivery date	Order date	Job status	Copies
<input checked="" type="checkbox"/>		00017	A4_16pages.pdf		27/09/2021 10:14	22/09/2021 10:15	Job imported	8

Ensure that the product has been chosen that corresponds to the output format that you need, eg. Booklet, double sided etc.

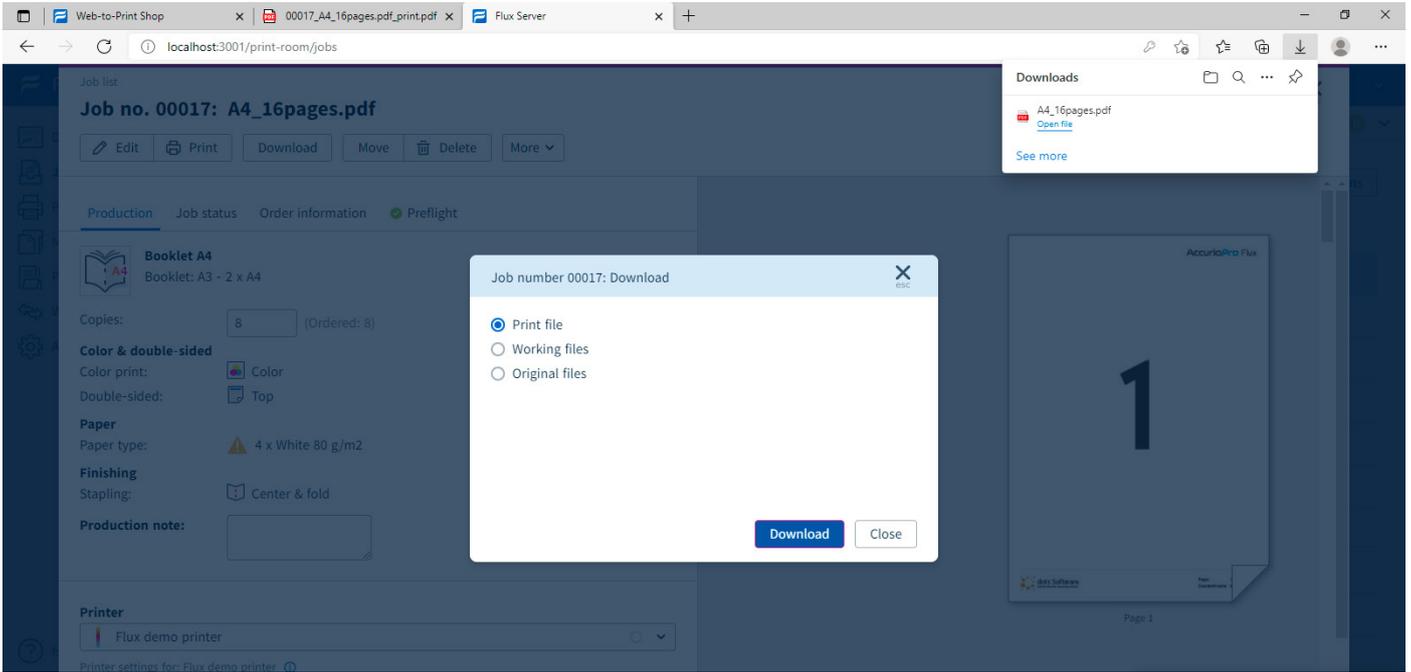

Click on View from the available options at the top of the list, highlighted in red above.

In Job View choose the Download option below the Job Title.

A dialogue will then open which will allow the Print File to be downloaded, the Print File will be ready to go straight to print.

After the download is complete check the Print file is as required.
